

Here is my original request: I have a PHP Laravel job board website that needs modifications. The site is: <https://carejobber.com/>. I need a PHP and Laravel expert who can be my developer. I need to change a lot of the core functionality to my taste.

(1). I need a custom job for the subscription sections. I need a monthly subscriptions and pay-per-post options for employers to buy a package and for job seekers to promote their resumes.

(2) A registered employer will need to have access to a partial resume of job seekers. The partial info to be displayed will be their job history and education. No details will be revealed unless the employer pays to see full details, like the name and contact information of the job seeker.

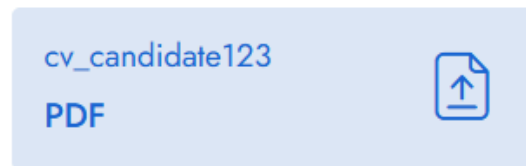

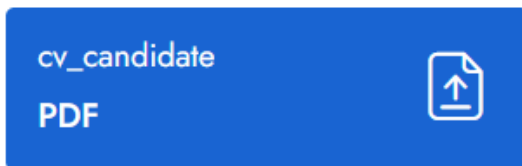

(3). I want resumes in list format to display the partial view like the above.

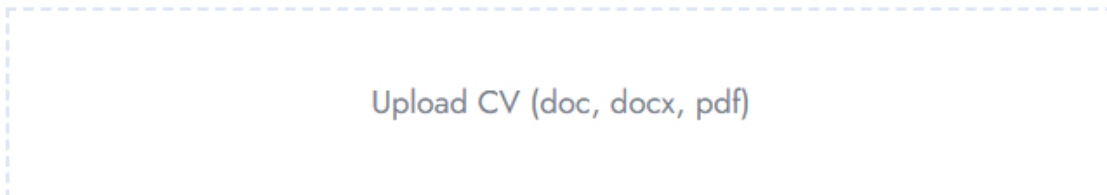

(4). I need to customize the job application page. When a job seeker clicks on a button to apply for a job, I want an option to add the resume that is on file in their account, or upload a new resume from their computer, and I need a text box to paste a cover letter within the pop-up.

Apply for this job

Apply Job

(5). I need a coded URL for the admin section to avoid hackers.

(6). I want to design multi-level locations for the website. For example, if I chose 1 level in admin settings, location will only display only cities throughout the site; if I chose 2 levels, location will

change to state>city; if I chose 3 levels, location will change to country>state>city. (See attached video).

(7). On the homepage, the form that is their currently allows you to search by job title and job category. But I want the homepage form to ask for job title and job location.

A screenshot of a job search homepage. The main search area is a white rounded rectangle with a light blue background. It contains two input fields: the first is labeled 'Job title, keywords...' with a magnifying glass icon, and the second is labeled 'City or postcode' with a location pin icon and a dropdown arrow. To the right of these fields is a green button labeled 'Find Jobs'. Below the search fields, there is a section titled 'Popular Searches :' followed by the text 'HCA, LPN, RN, Home Care, Recreation'. The background of the page is a light blue and yellow gradient with a faint map of the United States.

This is the start. I need to change some more stuff later.
