

1. ~~I want a job list like here: <https://abhhealthjobs.com/job-list-4/>. Please see the video: <https://imgur.com/qvRS5lb>~~
2. CV Search: Available CV Quota is not updating - this is a bug from the last job you did.
3. I don't want the free package to be bought twice within a month. The free package should be for 30 days. If they run out of quota for that month, I want to restrict access so they can get the already activated free version again for that same month, unless they purchase a paid package.
4. Add 'view less' on job list: job_list_side_bar.blade.php. Currently, there is a "view more" option, but no view less, I just want to add "view less".
5. On the job list page, I want the featured job or urgent jobs at the top.
6. During the job listing, I want the employer to have the option at the end of the form to add featured listing, urgent, and highlighted options, as shown in the video. Urgent jobs will be at the top of search results, followed by featured listings. Highlighted is not a priority, but it will have a highlighted background. Please see the video: <https://imgur.com/1LF5MVb>
7. ~~I want the employer dashboard to have a number of application cards like in the image: Let's say 3 candidates applied for the employer's job. Let the number of applicants be 3 so that they will know that someone has applied for their job. <https://imgur.com/a/IL9aBZl>~~
